EXPERIENCE

LifeMD, Huntington Beach, CA — Full-Stack Developer Veritas Platform

October 2021 - Current

- One of two developers responsible for the continued development of Veritas, one of our products that allows our physicians to remotely interface with our customer base. Built on the MERN stack, our application is deployed using various AWS technologies and utilizes Github Actions as a CI/CD pipeline.

FlashSpark Media, LLC Phoenix, AZ — Owner/Engineer Web/Biz-Apps for small businesses

August 2019 - Current

- Business application developer utilizing MERN stack and various 3rd-party APIs to craft applications that help businesses scale and become more efficient.

Client references and testimonials available upon request

Valid Strategy, Manhattan Beach, CA — Contract Software Developer

June 2018 - October 2018

- Developed automated cryptocurrency trading platform utilizing high-speed scraping and textual analysis of news sources to make trading decisions, and then execute on those decisions through the integration of multiple cryptocurrency exchange APIs.
- Helped develop a prediction model to locate 'unpublished' news articles, allowing early access to info
